

Flood Preparedness Guide

Community Disaster Management System

Preparedness checklist for quick community response and household safety.

Before Flooding

- Prepare an emergency kit with drinking water, dry food, torch, radio, medicines, power bank, and important documents.
- Keep mobile phones charged and save local emergency contacts, including 112 and nearby shelters.
- Move valuables and electrical devices to higher levels if flood warnings are issued.

During Flooding

- Do not walk or drive through moving floodwater, even if it looks shallow.
- Switch off electricity at the main supply if water enters the house and it is safe to do so.
- Follow evacuation instructions immediately and report trapped families through the portal or helpline.

After Flooding

- Return home only after authorities declare the area safe.
- Avoid contaminated water and disinfect surfaces, utensils, and stored items.
- Take photos of damage for assistance, insurance, or relief support records.
