

Wildfire Preparedness Guide

Community Disaster Management System

Preparedness checklist for quick community response and household safety.

Before a Wildfire

- Create a family evacuation plan and identify at least two escape routes from your neighborhood.
- Keep windows, roofs, and surroundings clear of dry leaves, paper, and flammable waste.
- Pack masks, eye protection, water, first-aid supplies, and identity documents in a ready bag.

During a Wildfire

- Leave early if an evacuation warning is issued. Do not wait for visible flames near your home.
- Wear full-sleeve cotton clothing, cover your nose and mouth, and stay low in smoky areas.
- Close all doors and windows before leaving to reduce airflow into the building.

After the Fire

- Watch for hot spots, falling branches, damaged electrical lines, and poor air quality.
- Do not enter a burned structure until local authorities or fire teams say it is safe.
- Request relief support for shelter, medical help, and food if the household has been displaced.
